

Job Title: Research Surveyors: Bay Ridge (Brooklyn), Manhattan and Bronx

Organization: Success Measures at NeighborWorks America

To apply for this position, please contact Monique Brown melwoodbrown@gmail.com no later than February 7, 2023 Please contact Monique Brown, at melwoodbrown@gmail.com with any questions.

Summary:

The Health Starts at Home: A Study of Health, Well-being and Connection in Affordable Housing Communities is a partnership between several universities, nonprofit organizations, and Jonathan Rose Companies. The purpose of the study is to understand if the health and well-being of residents is improved by providing resident-centered programs and services in 10 apartment buildings. One of those properties is located in Bay Ridge and we are seeking candidates available to work there who are bilingual in either English/Russian or English/Mandarin. Other properties are located in Manhattan and Bronx. Of the candidates needed for those sites, at least one is needed who is bilingual in English/Spanish.

Success Measures at NeighborWorks America is the organization responsible for the data collection. We are seeking research surveyors to support this study. Research surveyors will be compensated **\$30 per hour**, for a minimum of approximately 40 hours during February and March 2023. Surveyors must be able to provide their own transportation. All surveyors hired will be paid to complete a **required** Institutional Review Board (IRB) certification at the expense of Success Measures prior to conducting surveys.

This is a part-time position, contract position.

Duties/Responsibilities

- Meets with survey participants to discuss the requirements and objectives of the survey.
- Assists residents with survey, in person, using a hardcopy of the survey, or online.
- Collects data and survey results.
- Participates in bi-weekly meetings with supervisor.
- Performs other duties as assigned.

Required Skills/Abilities

- Excellent written and verbal communication skills
- Excellent organizational skills and attention to detail
- Strong analytical and problem-solving skills

Education and Experience

- Minimum of a High School Diploma
- At least one year of related experience preferred.
